

STORY W21. CHANGE QUANTITY

As a customer

I want to change the quantity of the products I added so that I can correct a wrong order.

WIREFRAMES

The wireframe shows a shopping cart interface with a header containing three links: HOME, PRODUCTS, and SIGN UP. Below the header is the title **SHOPPING CART**. The main content area is a table with four columns: **NAME**, **DESCRIPTION**, **PRICE**, and **QTY**. There are three rows of product entries. Each row has a horizontal line for the name and description, a horizontal line for the price, and a quantity input field containing the number '1' with up and down arrows. To the right of each quantity field is a button labeled 'CHANGE'. Below the table, there is a label **TOTAL AMOUNT:** followed by a horizontal line. At the bottom left is a button labeled 'PAY', and at the bottom right is the text **SHOPPING CART (3)**.

ACCEPTANCE CRITERIA

- The quantity of a product ordered can be changed in the overview or products ordered
- The total amount to pay is adjusted
- An error message is given if the new quantity is not a number
- An error message is shown if the new quantity is negative
- Setting the quantity to 0 will delete the order
