

## STORY W20. SHOW CART

As a customer

I want to see the products I added

so that I can check if I haven't forgotten anything.

## WIREFRAMES

The wireframe shows a shopping cart interface with a header containing three links: HOME, PRODUCTS, and SIGN UP. Below the header, the title **SHOPPING CART** is displayed. The main content area is a table with four columns: **NAME**, **DESCRIPTION**, **PRICE**, and **QTY**. There are three rows of product entries, each with a horizontal line for the name and description, a line for the price, and a quantity input field containing the number '1' and up/down arrows. At the bottom left, the text **TOTAL AMOUNT:** is followed by a horizontal line. Below this is a button labeled **PAY**. At the bottom right, the text **SHOPPING CART (3)** is displayed.

## ACCEPTANCE CRITERIA

- Each time a product is added, it is added to the overview
- The description of the product is shown, the quantity ordered, the unit price and the total price for this order.
