

STORY W12. ASSIGN ROLES

As an administrator
I want assign roles to users
so that I can limit access to sensitive information or functionality.

CLASS DIAGRAM:

TECHNICAL DETAILS

- Use a Java enum for the role.
- Modify the `person` table in the database: add a column for the `role`

ACCEPTANCE CRITERIA:

- Roles needed in the application:
 - o Customer
 - o Administrator
- When a person registers, he/she automatically gets the role Customer.
- For now, persons with other roles are added manually to the database.
