

STORY W22. DELETE PRODUCT ORDERED

As a customer

I want to delete a product order

so that I can change my mind after I entered the order.

WIREFRAMES

The wireframe shows a shopping cart interface with a header containing three links: **HOME**, **PRODUCTS**, and **SIGN UP**. Below the header is the title **SHOPPING CART**. The main content area is a table with four columns: **NAME**, **DESCRIPTION**, **PRICE**, and **QTY**. There are three rows of product entries. Each row has a quantity input field (containing the number 1) with up and down arrows, a **CHANGE** button, and a **DELETE** button. Below the table is a **TOTAL AMOUNT:** label followed by a line for the total. At the bottom left is a **PAY** button, and at the bottom right is the text **SHOPPING CART (3)**.

ACCEPTANCE CRITERIA

- A product can be deleted from the order
- The product is removed from the overview
- The total amount to pay is adjusted
- The total number of products added is adjusted
