STORY W09. ADD PERSON DESKTOP
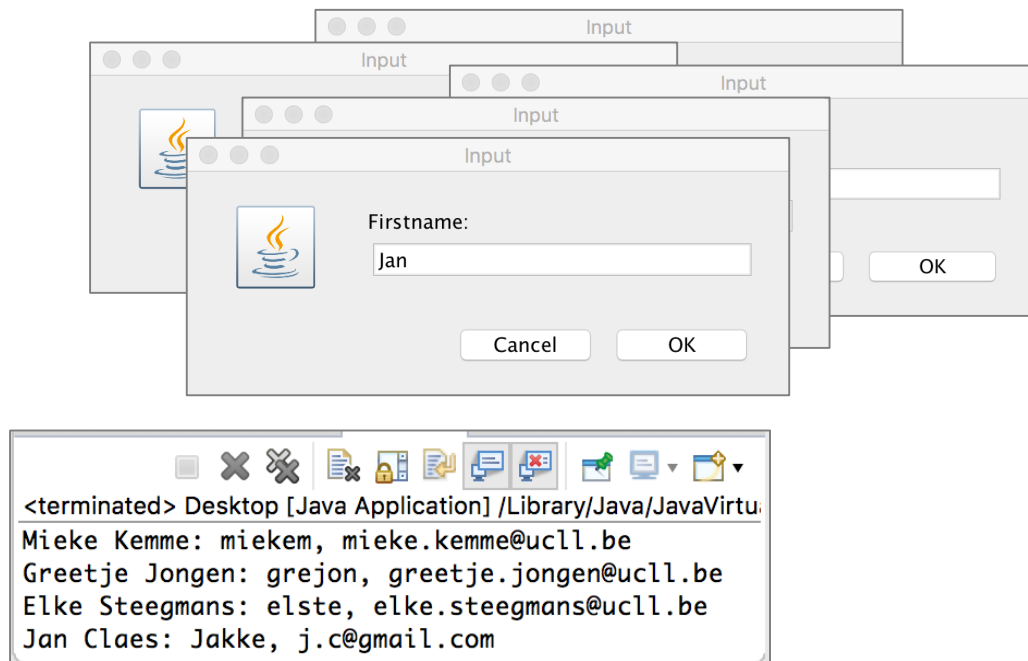

As a user
I want to be able to add a person without starting the web application
so that I quickly add a somebody.

EXAMPLE:

TECHNICAL DETAILS:

- The user interface can be very simple. You can:
  - add the code to the *main()* method of previous story,
  - use *JOptionPane.showInputDialog()* for the input

ACCEPTANCE CRITERIA:

- When starting the application, the first name, last name, and other details of the new person is asked.
- After the person is added, the overview is shown.
- The newly added person appears in the overview.
